

# ID Scanning and Verification throughout the Travelers' Journey

## Fighting Fraud and Delighting Travelers - Every Step of the Way

Jumio's unique computer vision solutions help the travel industry deliver great mobile customer experiences at check-in and booking, improving purchase conversion and reducing fraud in their mobile channel.

### Travel Booking

Create fast and effortless checkout experiences, minimizing the likelihood shoppers will abandon their mobile transactions before completion.

### Hotel Check-in

Credit card and ID scanning eliminates laborious manual data entry on small mobile devices, reducing abandonment and increasing hotel bookings using mobile.

### International Terminal Check-in

Airlines use digital ID verification to help balance the security requirements of data collection by providing passengers a quick and streamlined way to obtain boarding passes for international travel.

### Domestic Terminal Check-in

Travelers can scan their card to speed up payment when buying a flight ticket and then scan their passport to quickly check in for domestic flights.

### Taxi Services

Taxis can use computer vision technology to reduce fraud-related chargebacks and deter criminals, while rewarding good customers with a rapid checkout process.

### Vacation Rental

Real-time ID verification enhances the trust and safety efforts of the world's leading community-driven hospitality companies.

**38%** of travel customers abandon their mobile transactions<sup>1</sup>

**10%** of stolen credit card data is used to book flights<sup>2</sup>

International airlines lose **1%** of revenue (US \$1 billion) to online fraud<sup>3</sup>

The travel industry experienced a **0.37%** average overall fraud chargeback rate in 2014<sup>4</sup>
